#### 1. INTRODUCTION

Pulses Refer To The Dried, Edible Seeds Of Leguminous Crops. Pulses Play A Fundamental Role As A Low-Fat Source Of Protein And An Essential Component Of Traditional Food Baskets. These Are Most Essential Element For A Well-Balanced Diet And Major Source Of Protein To Vegetarian People Of India. There Are Several Varieties Of Pulses In India. Most Of Them Are Produced And Consumed Locally. Chickpeas (Chana), Pigeon Peas (Arhar / Toor Dal), Urad (Urad Dal), Mung (Moong) And Red Lentils (Masoor) Are The Top Five Pulses Grown In India. These Pulses Account For Over 80 Per Cent Of The Total Production In The Country. The Conversion Of Pulses Seed Into Dal Is Done Through The Process Of Milling. A DalMill Should Be Located In Rural Or Semi-Urban Area Which Have Excess Production Of Pulses And Connected To Market. The Project Deals With Variety Of Dal Such As Masoor Dal, Chana Dal, Urad Dal, Etc.

#### 2. MARKET POTENTIAL

Pulses Are Generally Used Along With Rice And Chapatti As Dal. Dal, Garnished With Onions, Tomatoes And Spices Is An Indispensable Nibble In Household. The Various Pulses Are Part Of The Normal Diet Of All Vegetarians And Are Also Used Frequently By Non-Vegetarians Too. They Are The Main Sources Of Protein. The Pulses Are Used For Preparing Hot Dishes, Sweet Dishes And Other Varieties. Pulses Are The Most Common Diet Part Of Indian Families. Dal Is Dry Cereal, Which Is Taken To Fulfill The Requirements Of Protein For A Normal Human Being. Due To The High Content Of Proteins Pulses Are Mixed In Other Cereal Foods To Increase The Quality Of Proteins To Be Injected In The Body.

India Pulses Market Reached A Volume Of 27.5 Million Tons In 2019. The Market For Pulses/Dal Is Present Largely In India Where Ninety Per Cent Of The Produce Is Consumed Locally. Pulses Are Now Increasingly Being Used In The Processing Of Ready-To-Eat (RTE) Food Products. As A Result Of Rapid Urbanization, Changing Lifestyle And Hectic Work Schedules, Healthy Snack Foods Are Becoming PopularAmongst The Working Population. The Demand For Pulses Will Never End But WillIncrease In A Increasing Rate And Rise In Population Also Drives The Demand For Pulses.

### 3. PRODUCT DESCRIPTION

#### 3.1 PRODUCT BENEFITS

- Provides Energy
- ➤ Excellent Source Of Vegetarian Protein
- ➤ Keeps Your Heart Healthy
- Diabetic Friendly
- ➤ Improves Insulin Response
- ➤ Lowers Blood Pressure
- ➤ High Fiber
- Weight Loss

### 3.2 RAW MATERIAL

Basic Raw Material That Is Used In Dal Mill Is Chick Peas That Are Directly ProcuredFrom Farmers And Packing Material Used To Pack Finished Product.

### 3.3 MANUFACTURING PROCESS

The Raw Material I.E. Some Pea Depending On Type Of Dal Like Chick Pea In Case Of Chana Dal, Are Procured From Vendor Or Farmers And Are Stored In Raw Material Warehouse As Per Production Requirements.

The Appropriate Type Of Pea Is Taken From Warehouse Into The Milling Plant As PerType Of Dal To Be Produced. These Peas Are Then Fed To A Soaking Tank Filled WithWater, Where The Peas Are Allowed To Soak In Water For Good Period Of Time Usually Close To 24hrs For Many Dals.

After Appropriate Soaking A Bucket Elevator Carries These Peas From Soaking TankTo Air Dryers Equipped With Blowers Or To Terrace For Sun Drying, Where Worker Spread Peas Appropriately In Case Of Latter Arrangement.

The Dried Peas Are Fed To A Reel Machine With Appropriate Grit Size Which Basically Perform The Function Of Removing Major Foreign Particles Like Other Peas, Sticks, Leaves Etc. These Peas Are Then Fed To Emery Roll Dehusker Which Simply Removes The Husk Or Skin Of The Peas, Thus Generating Whole Dal. This Whole Dal Is Feed To AnotherReel Machine With Finer Grit Size To Remove The Husk And Other Smaller Impurities.

This Whole Dal Is Now Fed To Lentil Splitting Machine, Which Simply Shear OpensThe Whole Dal Into Two Halves Thus The Dal Is Obtained, This Dal Is Now Fed To Dal Polisher Which Simply Polishes The Dal And Improves Its Appearance Followed ByWhich These Dals Are Collected In Bins, From Where They Are Packed In Sacks And Sent For Sale.

Note: All Dal With Similar Sized Peas Can Be Processed In Same Unit As Long As Machine Can Accommodate Range Of Variation.

#### 4. PROJECT COMPONENTS

### 4.1 <u>Land & Building</u>

The Approximate Total Area Required For Complete Small-Scale Factory Setup Is1200-1500 Sq. Ft. Approximately Smooth Production

### 4.2 Plant & Machinery

Bucket	A Bucket Elevator, Also Called A Grain	
Elevator	Leg, Is A Mechanism For Hauling	
	Flowable Bulk Materials Vertically. It	3
	Consists Of: Buckets To Contain The	
	Material	1 1
Reel	Reel Machine Is Used To Separate Out	
Machine	Impurities From The Grains Which Are	
	Bigger Or Smaller Than Mainstream	
	Material Size. Reel Cleaning Machinery	
	IsVery Versatile And It Is Used In	Reel Machine
	Several	
	Applications.	
Conveyor	Conveyor Systems Are Mechanical	
	Devices Or Assemblies That Transport Material With Minimal Effort. While	
	ThereAre Many Different	
	Kinds Of Conveyor Systems, They	
	Usually Consist Of A Frame That	
	Supports Either Rollers, Wheels, Or A Belt, Upon Which Materials Move From	
	One Place To Another.	
<b>Emery Roll</b>	Emery Roller Is A Machine For De-	
De Husker	HuskingPulses Thus This Machine Some	
	Time CalledAs Pulses Splitter. They Are	
	Used In Various Pulses Mills.	11
		_

Dal Polisher	Polishing Is Done To Increase Consumers Appeal And Is A Form Of Value Addition, Though Not Desirable. Dal Is Polished In Different Ways, Such As Nylon Polish, Oil/Water Polish, Leather And Makhmal Polish. Generally Polishing Is Done UsingSoap Stone, Oil Or Water. Polishing Gives Uniform Look And Shine To Each Grain.	BRT MACHINERY
Lentil Splitting Machine (Chakki 18")		
D- Stoner	The Main Function Of These Machines To Removes Stones, Dust And Heavy Impurities From Grains.	
Storage Tank	Storage Tanks Serve Two Major Purposes. One Is To Provide Storage Volume And The Other Is To Provide Pressure To The Distribution System. A Particular Tank Can Serve One Or Both Purposes Depending On Its Location Within The System And Its Type Of Configuration. There Are A VarietyOf Tank Types Or Configurations.	

Container ProductAnd The Raw Material Stored In The Unit.	Container Pro	king The erial Stored In
---	---------------	--------------------------

**Note:** Approx. Total Machinery Cost Shall Be Rs 10.36 Lakhs Excluding GST AndTransportation Cost.

#### 4.3 **Power Requirement**

The Borrower Shall Require Power Load Of 6 KW Which Shall Be Applied With PowerCorporation. However, For Standby Power Arrangement The Borrower Shall PurchaseDG Set.

### 4.4 <u>Manpower Requirement</u>

8 Manpower Are Required For The Gram Based Dal

MillIncludes:

- 1 Plant Operator
- 2 Skilled Labour
- 2 Unskilled Labour
- 2 Administrative Staffs
- 1 Accountant
